What Photoshop Features Are Available? Photo Editing: Paintshop Pro has simple tools to fix blemishes, crop and straighten images, contrast, brightness, and color. So if you have a simple photo that you want to make better, simply select the tool you want to work on your image. You can also add effects, move and resize, alter colors and sepia, save the file to the local drive, or print. Paint Shop Pro's features include: resizing, cropping, recoloring, straightening, rotating, and balancing. What if my photos are in the RAW format? RAW files are 32bit files and you can't convert them easily in Photoshop CS, although you can in Gimp. In the next step, you can open and import the raw image as a regular Photoshop file. It is an RGB file and you can simply open it like an image, crop, and add effects using the standard Photoshop interface. Copy and Paste: If you want to move the selection from one area of your image to another, you can use the rectangular or elliptical marquee tool to make your selection. Then, you can click on the copy tool and choose the area you want to copy to your image. Paste that selection where you want it to go. You can use the move tool to select, copy, paste, and move objects as well. You can use the snap tool to make selections based on the grid that automatically updates to the current selection. Toolbar: The top toolbar consists of the standard tools that every Photoshop user knows such as the brush, rectangle/ellipse, liquify, transform, and zoom. Below the toolbar, there are three other tabs. Image: this section provides you the ability to open your image in Photoshop, open a blank image, open a layer, import a file, or open a selection. Layer: this section allows you to add a new layer. You can create a new layer, make a background for the layer, merge multiple layers into one, duplicate layers, hide or adjust the opacity of layers, and delete layers. Layers Panel: this section allows you to view and work with your layers. In the Layers panel, each layer is represented by a curved line

70 percent of J&K students find it difficult to study in Kashmir Seven hundred students of top district schools failed to show up for the Common Admission Test to find out admission into the 1,000-odd MBA seats. Kashmir News Observer Srinagar, March 18 After Delhi, the beautiful city of Srinagar, the former capital city of Jammu and Kashmir, is the second most popular destination in the country for vacationing. But only 2.3 percent of the country's total income comes from tourism. After Delhi, the beautiful city of Srinagar, the former capital city of Jammu and Kashmir, is the second most popular destination in the country for vacationing. But only 2.3 percent of the country's total income comes from tourism. The government of Jammu and Kashmir announced in 2014 that it would be putting up on computer-based tests 1,000 seats of MBA and other management course entrance test. And while Chief Minister Omar Abdullah said that the government wants to ensure that only those who can manage the stress of such tests will enter management and other courses of education, more than 70 percent of students in Kashmir found the CAC most difficult. Teachers, researchers, students and bureaucrats spoke of the difficulties faced by students. "We don't have any other choice but to appear for the CAC. But it is a mind and nervous wrecking experience," said Faisal Saif Bhat, a Kashmiri student of BCA in Delhi University. Students say they are not provided good study material. "My interest lies in the field of management and in the past I had been prepared by the ministry of tourism for the aptitude test and I failed in the entrance test, which meant that I could not get admission," said a student, who didn't wish to be named. "The day before the exam we were told that we would not be allowed to take anything from the hostel. In fact we were asked to get admission into different courses and then change at the last moment to get into MBA. Most of the students study in the colleges outside the valley and we carry heavy luggage. But we do not have the opportunity to carry them because of the security restrictions." The government has said that students in Kashmir must appear for CAC to give them a fair chance to get admission and there are

What's New in the Photoshop 2021 (Version 22.4.3)?

The Warp tool allows you to move and resize an image. This is an essential tool for creating photos with different focal points or for creating "mosaic" designs from several images. The Pen tool allows you to create text or sketch-like designs. You can set the type size and color of the text, and the thickness and color of the strokes. The Gradient tool allows you to create photo-realistic gradient effects. You can use the Gradient tool to create a gradient across an image or a background, to create a video screen or simply to add a subtle border. The Channels window (Window > Channels) allows you to work with layer-based pixel information, control certain types of channel information, apply effects to them or use the Masking and Composition tools. The Healing Brush tool helps you remove objects from images. The Brush tool is used to add details to the image. The Eraser tool helps you get rid of unwanted elements in an image. It can be used for quick corrections or to remove a part of an image. The Clone Stamp, the Healing Brush tool, the Eraser tool and the Rotate tools are all part of the Photoshop Tools palette. To display the Tools palette, click the Tools button on the toolbar, or choose Image > Adjust > Tools > Photoshop Tools, or press the Windows logo key plus the T key. The Options dialog box (Windows > Options or Image > Adjust > Options) allows you to control the appearance of your image. You can adjust the color or finish of the image, adjust the number of colors displayed, or control how various Photoshop tools work. There are three Levels: Black and White; Gray; and Color. The Black and White Levels control how much of each color is shown. The Gray Levels control the lightness and darkness of each color. The Color Levels control the balance between the light and dark colors. There are eight Saturation Levels: Luminance; Color; and Hue. The Brightness slider is used to adjust the brightness of the image. It controls the overall lightness of the image, or the amount of light that is present. The Exposure slider is used to adjust the dark or light exposure in the image. The Colorize slider is used to adjust the lightness and darkness of only certain colors in the image. For example, the Colorize tool can be used to lighten or

darken purple. The Invert Colors slider controls whether the colors are inverted or not.
